

Sir/Madam:

I understand that you are considering expanding LPFM service and that this may cause KLOVE radio (which in some places uses FM translator) to be forced off of the air. Please do not do this. I am very concerned that my favorite radio station might be forced off of the air. There is a large audience of listeners in the Texarkana AR/TX area and we would be very upset if KLOVE were to stop broadcasting in our area. KLOVE offers great news about Christian concerns. They have information to help families grow closer together, and they also offer positive and encouraging music that is appropriate for children, teens and adults. If KLOVE were to stop broadcasting, I would not have any radio station to listen to that offers the type of music and programming that I like to listen to. KLOVE serves the public by providing helpful advice to people through its informative spots and through its music. If you don't believe me, try listening to it for yourself. They have many stations across the country. By listening to KLOVE, your outlook on the day will be more positive and you will strive to live a better life because of its influence. Thank you for reading my comments and have a nice day!
